## Electric driverless busses

### What challenge or problem are you addressing? What is the need for the project?

In consultation with the city of Genk, we want to examine the implementation of driverless electric buses in the area of the city of Genk from the city center to the regional hospital.

### Objective of the project:

To examine the feasibility of the project based on the experiences of similar foreign projects.

### Why do you need transnational cooperation?

Through this project, we want to take note of the experiences that partners have gained in similar projects abroad (eg. Wageningen(NL), Paris, Lyon (FR) Trikala (GR), Lausanne, Sion (SW)).

### Types of partners:

We are looking for partners who also consider to organize driverless busses and more specific transport organizations and local or regional public authorities.
